Indexes to Volume 1 (1982)

Subject Index

A.C. impedance of surface layers and blocking electrodes on single crystal β-alumina, 522
Activation energy determination in superplasticity,227
Approximations of Fuchs–Sondheimer theory for the case of total diffuse scattering in thin films, 453

β_2 relaxation in PET fibres, 308
Black stone of the Ka'ba: suggestions as to its constitution. The, 10
Boronizing treatment for low-carbon steels. A, 298

Cast aluminium–glass composites, 29
Cavitation in elastic media under hydrostatic tension. On, 32
Cement spring. A, 125
Changes in stress–strain behaviour of polyethylene upon soaking in an ESC environment, 121
Combined effects of Fe and H_2 on the nitridation of silicon. The, 337
Comparison of the dislocation substructure of PTS monomer and polymer. A, 479
Compounds in the $BaO–Re_2O_3–TiO_2$ systems, 37
Condensation of plasma-processed WC on graphite, 343
Co-polymerization of diallyl phthalate with alkyl methacrylates and styrene, 75
Crack initiation at microindentations on thermally toughened and untoughened glass, 341
Crystal structure of $LiFeSnO_4$, 116
Crystallization and crystal growth of CeO_2 under hydrothermal conditions, 461

Damping in fibre reinforced plastics, 53
DCS study in $Pd_{76}Au_6Si_{18}$ amorphous alloy, 127
Defect etchant for single crystal GaSb. A, 253
Defect structure of GaAs after selenium implantation through a Si_3N_4 layer. The, 457
Defect structure of Te-doped GaAs after cadmium diffusion. The, 275
Detection of lattice defects in InP and (InGa)As using selective photoetching, 358
Determination of Ho_2O_3 solubility in $(Bi_2O_3 + V_2O_5)–SiO_2$ flux by the thermogravimetric method, and the application of solubility data to the growth of rare-earth disilicates, 303
Direct conversion from amorphous to B-Si_3N_4, under high pressure, 455
Discontinuous precipitation reactions in α and γ phases meteoritic metal, 485
Double torsion fracture toughness test for evaluating transverse cracking in composites, 511

Effects of additions of α-Si_3N_4 grog on the α/β ratio of slip cast reaction bonded silicon nitride, The, 257
Effects of alkaline substitution and addition of trivalent ions of Pd^{2+} release by CuO-doped ceramic glazes, 173
Effect of $CaCO_3$ addition on the sintering of AlN, 325
Effect of compacting pressure on electrical conductivity of zinc phosphide pellets, 70
Effect of CuO as an impurity on the electrical properties of $NiO–Mn_2O_3$ NTC thermistor material, 99
Effect of deformation on selected area electron channelling patterns. The, 236
Effect of impurity on the habit of nickel molybdate ($NiMoO_4 \cdot x\,H_2O$) crystals in silica gel, 61
Effect of plastic deformation upon martensite burst temperature of Cu–47.3 wt% Zn alloy, 27
Effect of preheating on crystallization kinetics of Te–Si–Pb glasses, 207
Effect of shock treatment of TiN powder, 347
Effect of solute banding on transformation in dissimilar titanium alloy weldments, 229
Effect of water on the crazing of a crosslinked poly-(methylmethacrylate), 448
Effect on lattice parameter and hardness of manganese in extended solid solution in aluminium. The, 405
Effect on stirring on the bulk solidification of hypo-eutectic and eutectic Al–Si alloys, 39
Elastic anisotropy and kink band formation in oriented polymers, 153
Elasto-optic studies on potassium acid phthalate single crystal, 268
Electrical conductivity and equilibrium diagram studies in the $AgI-ZI_2$ system, 429
Electrical conductivity of BaS phosphors, 17
Electroconducting glass fibres produced by ion-exchange and reduction treatments, 426
Electron beam crystallization of amorphous germanium films in the electron microscope, 145
Environmental stress cracking fracture surfaces in polyethylene, 7
Equivalence of indentation and compressive creep tests on a WC/Co hardmetal, 519
Evaluation of K_{Ic} of brittle solids by the indentation method with low crack-to-indent ratios, 13
Expression of Hall coefficient of thin metal films in the presence of impurity effects, 423

Feasibility of a diamond composite yarn guide, 170
Fluorescence in $CsNdP_4O_{12}$, 232
Formation of aluminium oxynitride by carbothermal reduction of aluminium oxide in nitrogen, 147
Formation of surface iron nitrides. The, 421
Fractography of highly crosslinked polymers, 167
Fracture statistics of surface brittle materials under flexure, 413
Fracture toughness and fracture surface energy of lead borate glasses, 156
Fracture toughness in the $PbO–GeO_2$ and $PbO–SiO_2$

0261–8028/82/120543–03$02.86/0 © 1982 Chapman and Hall Ltd.

binary glass systems, 314
Fuchs–Sondheimer expressions for the strain gauge coefficients of supported thin metallic films, 409

Gamma-ray absorption studies in some scheelites, 310
General expression for the Hall coefficient of thin metal films, 260
General expressions for the TCR of thin metallic films and wires, 397
Glass formation in the tellurium-germanium system, 87

Hardness and oxidation resistivity of $MoSi_2$, 23
Heat treatment for En24 steel in the ferrite plus austenite range. The, 316
Hertzian crack growth in ThO_2 observed by serial sectioning, 441
High resolution transmission electron microscopy of InP, 499
High-temperature phase transition in $Sr_3Zr_2O_7$ determined by electroconductometric analysis, 217
Hydrogen solubility in AISI 4340 steel in the temperature range of 298 to 873 K and atmospheric hydrogen pressure. The, 489
Hydrostatic pressure dependence of elastic behaviour and stability against shear for yttria-stabilized zirconia. The, 416
Hydrothermal growth and characterization of VSZ-4 zeolite crystals, 195

Improvement of ductility and strength of the $L1_2$ compounds in Ni–Al–X (X = Cr, Mn, Fe, Co or Si) systems by melt quenching. An, 377
Indentation microfracture in the Palmqvist crack regime: implications for fracture toughness evaluation by the indentation method, 493
Indexed X-ray diffraction data for $La_4Ti_9O_{24}$, 312
Influence of fluorine ion on the spinel synthesis, 507
Infrared absorption in CuO–CaO–P_2O_5 CuI glasses, 407
Infrared spectra of the ceramic $LaCrO_3$ doped with strontium and titanium, 239
Infrared spectroscopic study of β-sialons in the system Si_3N_4–SiO_2–AlN, 529
Initial growth and defect structure of gellium phosphide layers deposited on $(\bar{1}\,\bar{1}\,\bar{1})$-oriented GaAs substrates, 45
Interaction of nitrogen with carbon in furances operating at high pressures and temperatures. The, 282
Interfacial bond strength of sisal-cement composites using a tensile test. The, 244
Internal friction and electrical conductivity in iron–vanadium–phosphate glasses, 264
Ionic conduction in $K_3LiNb_6O_{17}$ and $K_3LiTa_6O_{17}$, 133
Irreversible thermodynamic analysis of Nabarro–Herring creep. An, 185

Lattice thermal expansion in spinel $CdIn_2S_4$, 285
Lattice thermal expansion of rubidium calcium fluoride, 241
Lattice thermal expansion of rubidium cadmium trichloride in the cubic phase, 183
Limiting values of the specularity reflection coefficient in the Cottey size effect model, 271

Measurement of damping of PMMA and polyester resin by the coated beam method, 103
Measurement of the thermally-induced shear stress between two dissimilar materials. The, 58
Mechanical properties of chromium–copper alloy films, 381
Mechanical properties of multi-phase ceramics in the CaO–TiO_2–ZrO_2 system, 119
Mechanically induced phase transformations in CdS, CdSe and ZnS, 176
Mechanism of the chemisorption-induced segregation of titanium by chlorine in gold–titanium thin films. The, 35
Melt spinning parameters and the geometry of metallic glass ribbon, 385
Memory effect of crack resistance during slow crack growth in notched Al_2O_3 bend specimens, 327
Metallic glass–metal matrix composite. A, 211
Microindentation hardness of very thin polyethylene filaments with a shish-kebab structure, 496
Microstructure in ZnO thin plates from molten mixed alkali solutions, 4
Mode II fracture toughness of wood measured by a mixed-mode test method, 77
Model for electronic structures of chromium and manganese. A, 349
Molybdenum disilicide coatings on steel and its oxidation resistance, 19
Morphology of lanthanum molybdate spherulites, 471

Nature of subsurface damage in an aluminium–22 wt% silicon during dry sliding wear, 503
New compound $Si_3Al_4N_4C_3$ with wurtzite structure in the system Si_3N_4–Al_4C_3. A, 9
New "cubic" crystal compound. A, 351

Observations of LRO in Pd–Ce solid solution alloys, 463
Observations of superdislocation networks in Ti_3Al–Nb, 199
On determination of fibre fraction in continuous fibre composite materials, 249
On friction glazing of alloys, 94
On the effect of porosity on the kinetics of densification during pressure sintering, 400
On the mechanism of the radiation induced destruction of crystallinity in linear polyethylene, 451
On the morphology of dislocation etch-pits on cube faces of MgO in acids, 364
On the theoretical average crack spacing in brittle matrix composites containing continuous aligned fibres, 353
Oxygen embrittlement of Zircaloy-2 on long-term exposure to alkaline earth and rare earth oxides, 141

Perfection of polybis(p-toluene sulphonate) dicetylene crystals. The, 150
Phase transformations in a welded near-alpha titanium alloy–IMI 829, 371

Phase transition in silver bromate, 189
Preliminary diffraction study of electron-beam induced decomposition in α-AlH_3. A, 163
Preparation and characterization of KAg_4I_5 fast ionic conductor, 536
Preparation and some magnetic properties of acicular α-FeOOH, Fe_3O_4 and γ-Fe_2O_3 powders, 137
Preparation of glass-ceramics containing YIG, 106
Properties of laser beam deposited thin polycomponent films, 334

Radioluminescence of BaS : Cu, Bi phosphors, 435
Raman spectrum of the high temperature form of Nb_2O_5, 374
Rate effects in hardness, 391
Reassessment of accuracy in diamond-pyramid hardness testing. A, 109
Residual stresses and scaling CNTD SiC to larger sizes, 159

Secondary reaction of discontinuous precipitation in a Cu–1.4 wt% Be alloy, 306
SEM observations of broken fibrils at fatigue fracture in PVC, 475
SEM observations of crazing and fracture in polycarbonate, 394
SEM observations of neutron irradiation damage in LiF and ^{6}LiF, TLD polycrystals, 367
Shock-induced reactivity enhancement of zirconia powders, 445
Simple method to determine nonlinear compressive and tensile stress–strain curves using a sandwich beam, 247
SIMS analysis of oxygen on brittle fracture surface of molybdenum, 223
Sintering and dielectric properties of $KNbO_3$, 277
Solubilities of CdTe in the liquid 111_b metals, 80
Some aspects of the electrical conductivity of zinc phosphide thin films, 383
Some experiments on measuring the surface finish of plastic machined surfaces, 525
Some features of the structure and mechanical behaviour of unidirectionally solidified Al–$Al_{21}Pt_5$ alloys, 387
Some structural studies on polyester resin-concrete containing silane coupling agents, 467
Stability of transverse cracks in fibre composites. The, 321
Statistical treatment of stress concentration factors in damaged composites, 295
Strain-rate dependence of the yield stress of toughened polystyrene, 91
Strength of glass fibres in cement environments, 214
Structural defects and photosensitivity in evaporated lead selenide films, 83
Structure refinement of yttrium and α-sialon from X-ray powder profile data, 533
Study of the crystal structure of B–Ta_2O_5 by vibrational spectroscopy and X-ray diffraction. A, 219
Surface and bulk growth-induced strains in flux growth yttrium alumium garnet, 1
Synchrotron radiation damage in sodium bromate, 300

TCR of supported films from the effective Cottey model, 330
TEM and SEM analysis of the anode layer of aluminium electrolytic capacitors, 203
TEM study on the formation of microcracks in connection with α-martensite, 192
Tempered carbides in high-speed steels, 318
Terminal solubilities in Hume–Rothery systems, 403
Thermal diffusivity of simulated shales, 113
Thermal expansion of cupric thio spinel, 279
Thermal expansion of lanthanum dialuminide, 432
Thermal expansion of V_6GaSb, 67
Thermal stability of $Pd_{82}Si_{18}$ amorphous alloy under a pressure of hydrogen. The, 516
Thermoelectric power measurements in thin palladium films, 65
Thermopower measurements in chromium films, 539
Translucent β-sialon ceramics, 25
Transmission electron microscopy of ceria gels, 288
Twin-twin interaction in a Co–Cr–Mo alloy, 482

Uni-directional Invar effect in stretched PTFE. An, 179
Unusual oriented growth on as-grown silver crystals, 292

Vickers micro-hardness of NbC, ZrC and TaC single crystals up to 1500° C, The.

X-ray analysis of the transformed zone in partially stabilized zirconia (PSZ), 437
X-ray diffraction procedure for the estimation of the alpha and beta polymorph proportion in sintered silicon carbide. An, 131
X-ray studies on the structure of noncrystalline SnTe films, 419

Young's modulus of the craze in PMMA. The, 355
